

# LED-Signal-Gloves

for bicycles, scooters and boards

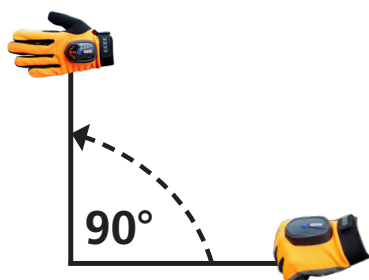

LED light arrow off

LED light arrow on

- Increase your own safety by being more visible
- Indicate turn by a LED light signal
- Easy to use: once set, simply turn on the LED arrow signal by hand movement
- Sportive design: multifunctional use during outdoor activities
- Rechargeable batteries
- Palm padding reduces blistering

## DISPLAY FUNCTIONS

By pressing the button (1), choose the lighting function of the LED arrow (2):

- Press once: Flashing function through hand movement, e.g. when turning\*
- Press twice: SOS flashing function
- Press three times: LED arrow lights up continuously

\* The set lightning function only occurs when the glove or the hand wearing the glove is in a vertical position and turns off once the hand is put in a horizontal position (see illustration below).

### Duration of use:

Depending on the chosen light function, one battery charge operate for approx. 2 hours. The battery can be charged on a PC or using a transformer at the socket. The charging time is approx. 30 minutes.

2 waterproof LED elements

1 pair of gloves  
orange/blue

Charging cable to charge both  
LED elements at the same time
