

DISH WASHING AND CLEANING AIDS MADE FROM COCONUT FIBER a 100% Natural Material

Origin

Coconut fibers are the natural covering of the coconut. A padding which protects the coconut when falling to the ground from a height of 20-30 meters. The fibers are actually become a growing aid gifted to them from their tree mother for the purpose of fertilizing the newly grown roots. When used as a raw material for floor mats, plant pots, fertilizers, cleaning aids and much more, this crude fiber is made usable with the help of pectin in an approx. 3-months storage period in water, which is followed by several mechanical treatment steps to create fibers and yarns.

The All-Rounder

The fibers for our coconut dish washing and cleaning aids are processed and cleaned in a numerous processes. We only use unbleached fibers and therefore do not use unnecessary chemicals. Therefore, the color remains natural brown. Their natural quality and stability make them ideal partners when it comes to cleaning sensitive surfaces: dishes, cutlery, coated pots and pans, ceramic and stainless steel, tiles, plastic and glass. They do not absorb water and therefore do not become a breeding ground for unwanted bacteria. They remove grease and mold. They are used in the kitchen, bathroom and the entire household.

100% Nature

Our coconut dish washing and cleaning aids mainly consist of this coconut fiber. Depending on the characteristics, we also use: galvanized wire, a wooden handle or liquid latex from the rubber tree. All materials come from nature and degrade naturally after use. There is no microplastic contamination of the water during its use and there is no plastic waste when used! If a fiber comes loose: no problem - simply dispose in organic waste. The ideal, natural replacement for plastic sponges, plastic fleeces and plastic brushes.

Coconut Scrub Pad

Coconut fiber with natural latex coating. Gentle but thorough cleaning of all surfaces. Does not damage shiny surface or coating, removes dirt permanently. No micro-particles are released. All components of this scrub pad are biodegradable. Robust and with a long service life. Natural latex supports the anti-bacterial effectiveness. 100% sustainable product.

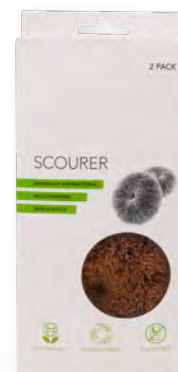

Ref.-No: 15 899
Size: Length 120 x Width 100 mm
Packing: 2 pads with cardboard sleeve with Euro-hole, 6 sleeves per shelf tray

Scouring Donut

Round shaped coconut scourer brush. Made entirely from organic coconut fiber. For sustainable cleaning of residue which is difficult to remove. Gentle to surfaces, uncompromising to dirt. The braided wire in the center consists of galvanized steel wire.

Ref.-No: 15 886
Diameter: 80 mm
Packing: 2 pieces in a box with window and Euro hole, 10 boxes per shelf tray

Dish Brush

Unbleached, organic coconut fiber cleans even coarse residues. Curved brush tip cleans the corners and edges in jugs and cups. Ideally suited for polished and coated surfaces. Wooden handle with strong braided wire made of galvanized steel. Handle can be made from FSC certified wood if required. With hanging hole.

Ref.-No: 15 887

Dimensions: Length 235 x Width 45 mm

Packing: 1 piece in a box with window and Euro hole,
8 boxes per shelf tray

Bottle Brush

Strong, organic coconut fiber cleans residues sustainably. Curved brush tip cleans corners and edges. Does not damage surfaces. Wooden handle with strong braided wire made of galvanized steel. Wooden handle can be supplied from FSC certified wood. With hanging hole.

Ref.-No: 15 888

Dimensions: Length 350 x Width 30 mm

Packing: 1 piece in a box with window and Euro hole,
10 boxes per shelf tray

Packing

Either in our Sanger packing with euro hole and shelf tray carton or in your branding. With or without Euro hole packaging or in a shelf tray box.
