

# Gloves

## Manufacturing Gloves

Dear Customer,

In everyday life we often use gloves without any difficulty. We wear gloves in the kitchen, cleaning the bathroom, when working in the garden, or in the workshop.

It is not always easy to choose the right kind of glove. There are many different types of disposable gloves, household gloves, working gloves for mechanical or chemical risks. All are made of different materials, with different coatings, in many sizes, thicknesses and weights. Choose the right glove or let us help you find the correct glove for your program that meets your needs.

Sänger is your reliable and competent partner. With more than 34 years of experience, we offer a wide range of products covering a scope of gloves for a wide range of applications.

Another important advantage of Sänger is the vertical integration of our company. We produce most of the offered gloves by ourselves, our partners operate latex plantations in which the raw materials are won. Our quality management starts with the environmentally-friendly harvest, the good manufacturing practice and the quality control, which is maintained in every production stage, up to the distribution of the gloves. This makes Sänger GmbH a reliable and powerful partner, which stands for a consistently high quality.

Our gloves give you the feeling of wearing a second, protective skin on your hands. They are lighter, extremely breathable, have the best protection properties and are competitively priced in comparison with the comparable products in the market.

Sänger – a name that stands for innovation, fresh design and good service. See for yourself!

Yours sincerely

Sänger GmbH

Quality standards of the latest Snger Working Gloves

Oeko-Tex Standard 100 is an independent testing and certification system for textile products from all stages of production fibres, yarns, liner fabrics and ready-to-use gloves. Gloves that carry the label 'Confidence in Textiles' are tested for harmful substances from environmental friendly production and are certified to be skin safe from the moment they come into contact with your skin.

Sanitized® is a hygiene function that offers a long-lasting safe and fresh wearing comfort all day long. Its antimicrobial hygiene function protects our gloves and eliminates the growth of bacteria, fungus and bad smell. SANITIZED is committed to responsible ecological practices. As last step in our production process each glove is washed with hot water to provide gloves of highest cleanliness to our customers. Each glove is dried in hot air.

Water Utilization  
The water which is used in washing our gloves is purified rain water. The waste water is continually recycled in our own ecological waste water treatment plant for our own usage.

CO2 Neutral  
The most consistent form of carbon-neutral energy use is the use of greenhouse gas-free energy sources. Using wood as fuel and no use of fossil fuels is one of the major carbon-neutrality. Since our rubber plantations re-plant more trees than the trees we use for fire wood, we safely ensure the carbon neutrality.

FSC-Forest Stewardship Council  
The Forest Stewardship Council (FSC) is an international not for-profit, multi-stakeholder organization established in 1993 to promote responsible management of the world's forests. Its main tools for achieving this are standard setting, certification and labeling of forest products. The FSC promotes these goals through auditing Management of Forests, Chain of Custody, Social Policy, Monitoring and Evaluation, Quality Assurance and Ecosystem Services. Use of the FSC logo for our latex is intended to signify that the product comes from responsible sources — environmentally appropriate, socially beneficial and economically viable.

REACH Regulations  
The Regulation of Registration, Evaluation, Authorization and Restriction of Chemicals REACH guarantees a high protection level for humans and environment against chemical pollution. All the raw materials we use in the production of gloves strictly comply with these European Chemical Regulations

BSCI membership  
The Business Social Compliance Initiative is a European leading business-driven development-orientated initiative for companies committed to improving working conditions in factories worldwide. The BSCI offers a surveillance and qualification system in order to create the ability to improve the working conditions of employees which is applicable to all sectors and sourcing countries. Our production is BSCI certified and strictly keeps to these European BSCI norms.

BRC Global Standard  
BRC Global Standards is a leading safety and quality certification programme, used by over 22,000 certificated suppliers in 123 countries, with certification issued through a worldwide network of accredited certification bodies. Having this standard guarantee the standardization of quality, safety and operational criteria and ensure our manufacturing plants fulfill their legal obligations and provide protection for the end consumer.

We produce the gloves shown in this catalogue as a regular product for our stocked range or as a campaign item.  
The packaging types can be modified as per request.  
Depending on the style, individual changes can be considered.  
Deliveries are made according to the conditions FOB, CFR, EXW (warehouse Germany) or free domicile.

**Sänger Prima** sets new standards for household gloves. Universally usable, very resilient and comfortable. The texture pattern on the finger tips and palms allows a better grip while the velour inner lining ensures high wearing comfort. The glove is made to resist standard household cleaning agents.

Sänger Prima household gloves are household gloves of first choice for household gloves.

- Natural latex
- Velour inner lining
- Slip-resistant

# Multitex – Market Comparison

Abrasion Resistance  
Multitex compared with other mechanical protective gloves with nitrile coating

Material Character-istics/Description	Measurement Units	Competitor's glove	Multitex
Competitor's glove: Multitex (Nylon/Elastan)	Water vapor permeability mg/(sqcm/h)	8.5	23.1
Nylon with nitrile coating	mg/(sqcm/h)	10.4 to 10.93	15.0

Measuring of Hand Warmth  
Our ideal D-knitwear construction provides a much faster ventilation of the worker's hand contrary to conventional cotton or polyester knitted gloves.

D-knitwear

Cotton knitted gloves

Polyester knitted gloves

# Multitex – breathable all-around

**Sänger Multitex** is as light as a feather and fits like a second skin. This glove combines all the benefits one can give to stressed hands. They are breathable and at the same time offer maximum safety, durability and excellent fit, as shown by the performance levels obtained according to EN 388. It is one of the lightest gloves available on the market in knitwear and coating. Compared with other gloves of the same category Multitex achieves almost three times the abrasion cycles and breathability performance. Even its nitrile coating is breathable.

- for mechanical work where sensitive touch is required
- suitable for oily, greasy and wet surfaces
- breathable all-around
- best grip
- very light
- Material: nylon/elastane, 15G, nitrile microfoam coating

# Cappella 13

– knitted for precision work with dots

**Sänger Cappella 13** knitted gloves with snug fit which are ideal for slip proof precision jobs. Hand protection against mechanical load. Breathable material. Vinyl dots offer a safe grip.

- breathable all around
- seamless knitted
- anti slip dots
- Material: nylon, 13G, vinyl dots

# Kurt

– for fishing and hunting

**Kurt** is a heat insulating glove made of lycra and neoprene for fishermen, hunters, photographers, etc. The fold-back thumb and index finger make it very practical. The hook-and-loop fastener guarantee a secure fit.

- Comfortable fit with sandwich cut
- Hook-and-loop fastener at the wrist
- Various sizes
- For fishing, hunting and more
- Made of lycra and neoprene
- Heat insulating, anti-slip palm surface
- Fold-back thumb and index finger
- With 2 fixing points for folded fingertips

# Philip

– reliable cut resistance

Safety is the first priority with this glove. The fabric contains stainless steel and serves as protection against injuries caused by sharp objects.

Whether the glove is used for filleting fish in the kitchen or by the fisherman outdoors – it offers protection and is comfortable to wear.

- Suitable for right-hand and left-hand use
- Cut-resistant fabric containing stainless steel
- Safe protection against knife cuts
- Extremely flexible and comfortable to wear
- Ideal for amateur fishermen, hunters, DIY enthusiasts and professionals
- Materials: 45% stainless steel, 30% polymer, 15% polyester, 10% yarn

# Tom – the pond glove

**Pond glove Tom** is a pond glove providing protection against moisture and dirt up to the upper arm. Very suitable for fishery, animal husbandry and gardening.

- Made of high-quality, strong PVC
- Inner lining made of knitted cotton
- Anti-slip palm for very good grip
- Abrasion resistant
- Protection against moisture and dirt
- Length: 61 cm

+ + usually the glove material is very suitable for the mentioned substance  
+ usually the glove material is suitable for the mentioned substance and will only show a mild degenerative effect  
- gloves made of this material have only a very limited suitability for the chemical substance  
- - gloves made of this material are not suitable for the corresponding chemical substance  
no Symbol no results known  
The above list includes information generally known in the gloves trade, for which we do not resume any responsibility or guarantees. It merely serves as orientation aid. Protection against chemicals and substances is always depending on many factors, i.e. glove material, contact time, temperature etc. Disposable gloves usually provide a very limited protection against chemicals.
